

AKASH SARDAR

Software Developer with 4 years of experience.

WORK EXPERIENCE

Application Software Engineer-2 @ORACLE

May 2024 - Present | Hyderabad

- Developed and maintained **Redwood** pages and fragments for **Oracle Fusion HCM** using **Visual Builder Cloud Service(VBCS)**, a low-code cloud-based software development platform.
- Collaborated with Product, QA, and Support teams in an Agile environment to deliver new features and resolve critical customer issues, impacting **15M+** users across **12,000+** global enterprises.
- Enabled **Runtime customization** in Redwood pages by introducing Oracle **JET Dynamic** components (forms, tables, containers) and **Business Rules**, allowing admins to control **visibility**, **required conditionally**, and **default value** properties of a UI region.
- Worked extensively with **EFF**(Extensible Flexfields) and **DFF**(Descriptive Flexfields) to deliver customizable business attributes without programming, enhancing adaptability to diverse organizational needs. Designed and maintained an EFF-specific Fragment, a reusable UI component leveraging Oracle Application Core API to retrieve **customer-defined business attributes** for product tables (assignment, department, position) and render them in Global Human Resource pages for processes such as Hire an employee, Add assignment, and Change location, etc.
- Implemented **parallel REST** calls for Forms and **Lazy loading** for Tables to efficiently handle large-scale customer data. Reduced page load time by at least **30%** by introducing asynchronous background data fetching during vertical scrolling through configurable limit and offset parameters.
- Improved Redwood page usability by resolving critical **Accessibility** issues (JAWS screen reader, focus, scrolling, keyboard navigation) in collaboration with **JET** and **Spectra** framework teams, ensuring **WCAG** compliance.

Project Engineer @WIPRO

Jul 2022 - Apr 2024 | Kolkata

- Java backend developer at an on-site project at **Uber Technologies Inc.**
- Designed and managed CRUD APIs using **gRPC** for low-latency communication between services in Uber's Taurus resource-management platform.
- Conducted thorough unit testing of the APIs using **JUnit** and **Mockito**, achieving more than **85%** code coverage and reducing regression bugs. Assisted with API documentation and testing with Postman.

EDUCATION

Jadavpur University

Aug 2018 - May 2022 | Kolkata

Bachelor of Engineering (B.E.) in Electronics and Telecommunication Engineering.

CGPA: 9.17/10

PERSONAL PROJECTS

RouXplorer - A Rubik's Cube scanner & solver based on ROUX

[Source code](#) | [Visit Cube Solver](#)

- Used **OpenCV.js** to scan scrambled cubes and the **ROUX** method to solve them, covering all 5 major phases—**First Block**, **Second Block**, **CMLL**, **PLL**, and **LSE**—in about **60 to 80** moves.
- Implemented **Iterative Deepening Depth-First Search (IDDFS)** and **algorithm lookups** (e.g., **J-Perm**, **Sledgehammer**, **Sune**, and **Antisune**) to handle intermediate cases and reach the **goal state**.

FitQuest - AI fitness tracker & recommender website

[YouTube](#) | [Backend Code](#) | [Frontend Code](#)

- Enables users to log **gym workouts** and **physical activities**, leveraging the **Gemini API** to estimate **calorie burn**, **heart rate**, **targeted muscle groups**, and provide helpful **feedback** and **recommendations**. Built personalized **fitness profiles** using fitness goals, body metrics, calorie intake, sleep, and recent activity history to generate AI-driven daily fitness challenges and diet plans.
- Built an **event-driven microservices** architecture comprising **User Service**, **Activity Service**, **AI Service**, and **API Gateway** using **Spring Boot**, with a **React.js** frontend and **polyglot persistence** using **MySQL** and **MongoDB**. Implemented **Spring Security** with **JWT authentication**, **RabbitMQ**-based **asynchronous** processing, and **Docker** containerization for services and databases.

akashsardar383@gmail.com
Kolkata, West Bengal, India

SKILLS

Java
Spring Boot
Oracle VBCS
Oracle JET
Oracle SQL
Postman
Git & Github
Chrome's devTool
Data Structures
Algorithms
System Design
Computer Networks

ACHIEVEMENTS

LeetCode Max rating: **1944** (Top **3%** globally + Knight badge). Solved **1200+** DSA problems.

Codeforces Max rating: **1577** (**Specialist / Cyan**).
Best rank: **624th** out of **44,000+** participants in Codeforces round 918.

CodeChef Max rating: **1843** (**4 stars**).
Best rank: **74th** in Starters 134 Div-2 contest.

Final-year college project, a **deep learning-based rocker bogie rover** for weed-plant detection and removal, got selected for funding under the Student Innovation Grant Program of **ARTPARK**, IISc Bangalore.
